

AIRPOUCH EXPRESS 3 VOID-FILL SYSTEM

Product Description

The AirPouch® Express 3™ Void-fill System – Versatility, lower shipping costs, and improved productivity in a compact, tabletop unit.

The AirPouch Express 3 Tabletop Void-fill System provides on-demand, easy-to-use air pillows for high packing productivity, reduced shipping costs, and increased customer satisfaction. Weighing in at just 35 pounds, this compact, all-electric system features operator-friendly controls and virtually maintenance-free operation. Simply plug the unit in, load the air pillow material, and start packing.

The AirPouch Express 3 also offers a wide variety of accessories and integrated system configurations for optimum productivity in each unique application. Basic accessories can be added to the Express 3 to create a simple, stand-alone packing station, or the system can be integrated into existing high-productivity, multi-station order fulfillment operations.

The Express 3 is the first pre-formed pillow system to offer knifeless operation, eliminating the primary wear item found on most other machines in its class. Instead, AirPouch air pillows use a patented perforation that automatically separates for filling, then re-seals as it passes through the machine – without compromising speed or seal integrity. AirPouch pillows also feature our exclusive EZ-Tear™ Perforations that are preferred for their easy handling and effortless pillow separation.

AirPouch void-fill air pillows are available in a variety of material types, including standard EarthAware® Biodegradable* and Recycled Films. These pillows offer superior seals and puncture resistance for durability and reliable air retention.

System-matched for optimum performance on the Express 3 system, AirPouch void-fill air pillows are available in a range of lengths, widths and mil gauges to suit any void-fill application requirement.

Industries Served

- Mail Order and Ecommerce Fulfillment
- Pharmaceutical Fulfillment
- Third Party Logistics

Key Features

- Provides air pillows on demand for fast, easy packing in semi- or fully-automatic modes
- Tabletop system produces air pillows at speeds over 55 feet per minute
- All-electric design does not require compressed air to operate
- Better air retention and improved yield reduce cost per cubic foot
- Dust-free air pillows reduce product loss and are cleaner to use than EPS peanuts and paper
- Variety of pillow sizes allows the optimization of space within shipping boxes
- EZ-Tear Perforations are packer-friendly and designed for improved efficiency and ergonomics
- The AirPouch Express 3 uses EarthAware Biodegradable and Recycled Film
- Monitor usage and conduct diagnostics through an onboard connectivity port

Optional Additions

- Machine Stand
- Storage Hoppers
- Automatic product level sensors
- Dispenser attachments
- Footswitch
- Compact overhead hopper and stand
- Custom engineered solutions for unique packing station requirements
