

HUMI DRYER CONTAINER DESICCANT

Product Description

Stream Peak's container desiccant removes moisture from the air in a shipping container, preventing condensation from occurring. A moist environment may invite mould, mildew, and corrosion, which may cause product damage. This can be prevented by using desiccants to absorb water vapour from the enclosed air in the container to maintain a low relative humidity level.

The container desiccant contains non-toxic natural clay desiccant mixed with a small amount of calcium chloride which can adsorb water vapour up to 80% of its own weight. It comes in two different forms which are the Humi Dryer Bag and Humi Dryer Strip. Suitable for shipping commodities such as coffee beans, canned food, flour, rice etc. When moisture-sensitive goods are being shipped, poor protection would cause the products to get damaged which in return will cause you monetary loss.

Humi Dryer Bag

Humi Dryer Bag is made of two materials layered together, Tyvek® and Cloth. The yellow cloth acts as a protective layer for the condensation.

Humi Dryer Strip

Humi Dryer Strip is segmented into joint bags made of Tyvek® material.

Industries Served

- Aerospace
- Chemicals and Gas
- Defence
- Electronics
- Engineering
- Food
- Healthcare
- Logistics and Transport
- Pharmaceutical
- Refinery

Key Features

- Simple installation
- Non-toxic
- Food-grade
- Made from Clay and Calcium Chloride
- Reduces humidity inside shipment and storage containers
- Absorbs up to 80% of its own weight
- Can be produced unsealed, sealed, sealed with a cable tie, sealed plastic hook or sewn with a cloth. (Humi Dryer Bag only)
- Packing material: Tyvek (Humi Dryer Strip only)

Product Specifications

HUMI DRYER BAG			
Item No.	Weight	Quantity	Remarks
CHY0500B1	500 gm	30BAG/CTN	YELLOW BAG
CHY2000B1	2 Kg	10BAG/CTN	YELLOW BAG with CABLE TIE
CHY2000B2	2 Kg	10BAG/CTN	YELLOW BAG W/PLASTIC HOOK
CHY2000B3	2 Kg	10BAG/CTN	YELLOW BAG SWEN CLOTH

HUMI DRYER STRIP	
Item No.	Weight
Sizes	1 Kg and 1.5 Kg
Type	Single Sachet or Bags
